

**Product: 15 Density Flame Lamination Foam**

**Product Code: FV-In Rolls-15F**

We offer **15 Density Flame Lamination Polyether foam** in rolls form in customized thickness and width option as per specific customer and end application requirements. 15 Density Flame Lamination foam grades are Low-Density foams and therefore consider best for processing economical range foam products.

These foam are supplied in roll form and are used widely in Single/Double side & Multilayer flame lamination machines to meet a broad range of industrial & comfort applications.

We process these foam through Looper with a joint option at 30, 60, and 120 meters as per specific customer requirements In looper long blocks head and the tail of the block are combined, creating a big ring. A ring created meets a cutter placed in the machine that professionally slices the block into any required thickness in roll form.

The quality of these foams is judged on parameters like Tensile, Elongation, Hardness, Density, Tearing Strength, Pin Hole, Color Marks & spread, and Rebound to name a few.

### Advantages

- A. Economical.
- B. Offer good flame lamination properties.
- C. Perfect for any type of flame lamination.

### Specifications

**Density:** 15 Kg/m<sup>3</sup>.

**Common Thickness:** 1.6 mm to any required.

**Common Width:** Starting from 1.30 meters up to 2 meters.

**Common Colors:** White, Grey, and Black.

**Supply:** No supply constraint.

**Packaging:** Each Roll in an HM plastic sheet and then in an HDPE bag.

**Compressed Packaging:** Not Possible.

**Delivery:** Within 5 days once the order is confirmed.

### Application

Processing a wide range of flame lamination products for end products like Shoes, Seat Covers, Underlay and many more.
