

**Product: 100 to 150 Density Rebounded Foam**  
**Product Code: FV-Recycled-100**

We offer high-density Rebounded foam processed from shredded foam offcuts. These shredded foam chips are combined with a special adhesive, later compressed and steam cured to get quality Rebounded foam blocks in the required Density, Hardness, Flexibility, and other properties. These high-density foams are ideal for high-impact situations where strong rebounds or protection is required.

High-Density Rebounded Foam offers an economical option compared to processing pure grade in the same density while offering similar foam properties.

### Advantages

1. Offer similar properties to pure foam at very low pricing.
2. Offer High Rebound.

### Specifications

**Foam Density Range:** 100- 150 Kg/m<sup>3</sup>

**Size & Thickness:** As per requirement.

**Color:** Multi-Color

**Supply:** No supply constraint.

**Packaging:** A set of sheets in a Black LDPE sheet then in an HDPE bag.

**Delivery:** Within 5 working days once the order is confirmed.

### Application

Automotive (Used at a different location for NVH applications (Noise, Vibration, and Harshness), Sports (Yoga Mats, Gym Mats), Acoustic (Both Industrial and Commercial), and Packaging industry.

High Density Rebounded

Rebounded Foam Blocks

Wide Range

### About Foam Villa

Foam Villa, aspires to be the global epicenter for the Poly Urethane Foam industry along with its exhaustive list of associated chattels. Strengthened by a strong global network of PU Foam & allied Industry professionals, manufacturers, consultants, suppliers, and a dynamic team; the organization provides end-to-end solutions across every aspect of the business.

### Why Foam Villa

- Expert Consultancy
- Global Tie-ups
- Competitive Pricing
- Quality Products & Services
- On-Time Delivery
- Business Transparency
